Josh and Leeanne started The Seed Vine in 2015 after growing tired of being ripped off when buying seeds online. As gardeners, all we wanted were quality seeds that germinated.

So we changed how seeds were sold online in Australia!

We show pictures of our seeds and we label them correctly. We store them appropriately and reorder if they are no longer viable. We research our seeds and can answer most of your questions.

We became the seed store that WE wanted to buy from.

Our integrity has now become the benchmark for seed sellers in Australia. Other sellers have copied our instructions, our photos and have even started providing photos of their seeds.

As of August 2020, The Seed Vine has provided plant seeds to over 50 000 customers across 100+ countries.

Disclaimer

The Seed Vine provides our customers with the highest level of quality and service. However, seeds are a live product which depend on many important factors to achieve germination. We store and refresh our seeds in order to keep them in excellent condition. However, we understand that sometimes mother nature will produce results that both surprise and disappoint. When ordering, please keep in mind that each plant species requires unique environmental factors such as stratification periods, sowing depth, temperature and light requirements, soil types and moisture content to obtain optimal results. Please read the information we have provided for each seed type if you have any doubts to the suitability of the seeds prior to placing your order.
